Renewable Energy Committee is formed in the college to promote the use of Renewable Energy technologies (Solar, Wind, Biomass, etc) to partially meet the energy needs of the college campus. Energy is a vital input for economic and social development. Growing concern on the depletion of fossil fuel reserves and detrimental effects of conventional energy sources on environment makes it imperative to maximize the use of Renewable Energy Sources which are economically viable and environmentally friendly. The Committee aims at the development and popularization of such technologies.

Functions of the Committee:

1. To generate ideas and technologies that can be used to improve the use of Renewable Energy usage in college campus.
2. To protect the environment by increasing the use of Renewable Energy Sources and decreasing the use of conventional sources of energy.
3. To expand the existing Solar power generation in the campus by developing Solar trees and lamp posts.
4. To study the scope for using new Renewable Energy Sources such as wind and biomass in the college campus.
5. To conduct workshops and seminars to promote the importance of Renewable Energy Sources, mainly focussing on Solar energy.
