- Cloud Architect
- Cybersecurity Analyst
- Data Analyst

4. **Required Skills & Competencies:** To succeed in today's technology industry, students need a combination of technical skills, professional competencies, and personal abilities. Companies look beyond coding and value well-rounded professionals.

**Technical Skill:** These are fundamental skills required to work with technology.

- Basic Programming Knowledge
- Database Management
- Networking Fundamentals
- Cloud & Digital Tools
- Software/Technology Awareness

**Analytical & Problem-Solving Skills:** Ability to analyze situations and find logical solutions.

- Logical thinking
- Data interpretation
- Root cause analysis
- Decision making

5. **Strategic Career Roadmaps:** A Strategic Career Roadmap is a structured plan that helps students move step-by-step from education → skill development → employment → career growth in the technology field.

#### **Understanding Career Goals**

- Identify interests and strengths
- Understand industry demand
- Choose a suitable tech domain

#### **Self-Assessment**

- Communication skills
- Problem-solving ability
- Learning capacity

#### **Skill Development Roadmap**

##### **Foundation Level**

- Programming basics
- Computer fundamentals
- Networking basics
- Database concepts

##### **Intermediate Level**

- Domain-specific tools
- Mini projects
- Internships
- Certification courses

### **Advanced Level**

- Specialization
- Real-world projects
- Industry tools
- Portfolio development

**Certification & Learning Strategy:** Certifications increase employability.

### **Examples**

- Cloud certifications
- Data analytics certifications
- Cybersecurity certifications
- Project management certifications

### **Learning Sources:**

- Online platforms
- Workshops
- Hackathons
- Technical communities

### **Experience Building Methods**

- Internships
- Freelancing
- Open-source contributions
- Technical competitions

### **Interactive Activities:**

#### **1. Q&A Session:**

- Dr Srikant Chinthakidi facilitated an engaging Q&A session, encouraging participants to ask questions throughout the lecture. Queries ranged from the latest advancements technologies in IT industry.

#### **2. Case Study Analysis:**

- Dr Srikant Chinthakidi guided the audience through present “Beyond Coding:High Growth Tech Careers and Strategic Roadmaps”. Participants were asked about doubt in upcoming technologies.

#### **3. Live Polling:**

- Real-time polling was used to gauge participants' opinions on the future of growing upcoming technologies in IT industry and applications. The results were discussed, providing insight into current technologies and further upcoming AI and Data science in IT sector.

<p>Key Takeaways/Outcome</p>	<p><b>1. Awareness of Modern Technology Careers</b></p> <ul style="list-style-type: none"> <li>• Students understand that technology careers go beyond traditional programming roles.</li> <li>• Awareness of emerging domains such as AI, Data Science, Cybersecurity, Cloud Computing, and UI/UX.</li> </ul> <p><b>2. Understanding High-Growth Career Opportunities</b></p> <ul style="list-style-type: none"> <li>• Identification of fast-growing technology domains.</li> <li>• Knowledge of career options suitable for both coding and non-coding interests.</li> <li>• Understanding industry demand and future job trends.</li> </ul> <p><b>3. Importance of Skill-Based Learning</b></p> <ul style="list-style-type: none"> <li>• Recognition that employability depends on skills, projects, and practical exposure, not only academic marks.</li> <li>• Understanding required technical and soft skills.</li> </ul> <p><b>4. ### Synopsis of the Activity (Description)

The guest lecture by Dr Srikanth Chintakindi on “Beyond Coding:High Growth Tech Careers and Strategic Roadmaps” selection of software domain and skills required . Technology careers today extend far beyond traditional software programming. Organizations need professionals who combine technology knowledge, business understanding, creativity, and analytical thinking. Traditionally, technology careers were associated mainly with software developers and programmers. Today, the technology industry has expanded, creating many roles where coding is not the primary requirement.

High Growth Tech Careers are technology-related professions that are rapidly expanding due to advancements in digital technologies, automation, artificial intelligence, and global digital transformation. High and emerging technology jobs with strong future demand, while Strategic Roadmaps provide a clear step-by-step plan to acquire the skills, experience, and knowledge required to succeed in those careers.

The event concluded with a Q&A Session, allowing attendees to engage with Dr Srikanth Chintakindi and discuss about beyond coding: high growth tech careers and new technologies. Overall, the lecture was a significant success, offering valuable knowledge and inspiring the audience to contribute to the further new upcoming technologies in IT field.
